Programme Outcomes (POs)

Program Outcomes (POs) are statements that describe what students are expected to know, be able to do or understand by the time they complete their degree. These POs are aligned with the mission and goals of the institution and are designed to help students achieve their academic and professional goals.

Programme Outcomes (POs) for Bachelor of Arts:

- **Knowledge**: Graduates will have acquired a broad and deep understanding of the liberal arts and humanities, including history, literature, philosophy, and the social sciences. They will be able to demonstrate proficiency in reading, writing, speaking, and critical thinking.
- Communication Skills: Graduates will be able to communicate effectively in a variety of settings, using a range of media, such as written communication, oral presentation, and visual media.
- **Critical Thinking**: Graduates will be able to analyze, evaluate, and synthesize information, arguments, and ideas from a variety of sources and perspectives.
- Ethical and Social Responsibility: Graduates will be able to recognize and understand ethical issues, and apply ethical reasoning and social responsibility to personal and professional situations.
- Cultural Competence: Graduates will be able to understand and appreciate cultural diversity, including differences in language, ethnicity, religion, and gender.
- Leadership and Teamwork: Graduates will be able to demonstrate leadership skills, work collaboratively in teams, and solve problems effectively.
- **Lifelong Learning**: Graduates will be able to pursue lifelong learning, through continued education, personal development, and professional growth.

These program outcomes provide a framework for the Bachelor of Arts curriculum and serve as a guide for both students and faculty in designing and assessing learning experiences that support student achievement of these outcomes.

Programme Outcomes (POs) for Bachelor of Commerce:

The programme outcomes of Bachelor of Commerce (B.Com) may vary slightly depending on the specific university or institution. However, some common programme outcomes of B.Com are:

- **Knowledge:** Graduates will have a broad and in-depth knowledge of the theoretical and practical aspects of commerce, accounting, finance, economics, taxation, and other related fields.
- **Skills:** Graduates will develop the necessary skills to analyze, interpret, and communicate financial information, as well as to apply accounting, taxation, and financial principles to solve real-world problems.
- Ethics: Graduates will understand the importance of ethical behavior in business and be able to demonstrate integrity, objectivity, and professional competence in their work.
- Entrepreneurship: Graduates will have the ability to identify and evaluate business opportunities and develop innovative solutions for new and existing businesses.
- **Communication:** Graduates will have effective communication skills to interact with diverse stakeholders, including clients, colleagues, and regulatory bodies.
- **Technology:** Graduates will have the knowledge and ability to use modern technologies and software applications in commerce and accounting, including accounting software, financial modeling tools, and databases.
- Global Perspective: Graduates will be able to understand and analyze the global economic environment, including international trade, foreign exchange, and crosscultural issues.
- **Leadership:** Graduates will have the necessary skills and knowledge to assume leadership roles in business organizations, including managing teams, making decisions, and implementing strategies.

These program outcomes provide a framework for the Bachelor of Commerce curriculum and serve as a guide for both students and faculty in designing and assessing learning experiences that support student achievement of these outcomes.

Programme Outcomes (POs) for Bachelor of Science:

The program outcomes for Bachelor of Science (B.Sc.) program can vary depending on the specific field of study. However, some general program outcomes for the B.Sc. program can be:

- **Knowledge and Understanding**: Students will acquire in-depth knowledge and understanding of the scientific principles and theories relevant to their chosen field of study.
- **Practical Skills**: Students will develop practical skills through laboratory work, fieldwork, and other forms of hands-on learning to solve scientific problems.
- **Critical Thinking**: Students will develop critical thinking skills and the ability to evaluate, analyze and synthesize information.
- Communication Skills: Students will develop effective communication skills through written reports, oral presentations, and other forms of scientific communication.
- Research Skills: Students will develop research skills such as the ability to design
 and conduct scientific experiments, collect and analyze data, and draw valid
 conclusions.
- **Professional Ethics**: Students will understand and adhere to professional ethics and scientific integrity in their chosen field of study.
- **Lifelong Learning**: Students will be prepared for lifelong learning and professional development, including the ability to adapt to new scientific developments and technologies.

These program outcomes will vary depending on the specific field of study in B.Sc. program such as biology, chemistry, physics, mathematics, computer science, etc.
